Construction Tax Saving. We'll Guide You Through It.

If you've built or bought a commercial property for over \$1 million in the last 10 years, a cost segregation study could lower your tax bill by five, six or even seven figures. This engineering based study looks for, analyzes and allocates specific improvements or tangible property over 15, 7 or 5 years instead of 27.5 or 39. You could find increased deductions, accelerated depreciation and improved cash flow by writing off assets like an obsolete, damaged or replaced roof, boiler or windows, for instance. Find out more. Call for a FREE ESTIMATE of potential tax savings. We'll guide you through it.
